

August 15, 2020

"I witnessed the Disinfect & Shield product sprayed on July 1st, 2020 in several facilities in New York City. The team used an ATP meter to test the bacteria on surfaces before and after Disinfect & Shield Surface Shield was applied. Both a world-class hotel and a prestigious private membership club were sprayed and tested using the Disinfect & Shield product. The post-application test results from the ATP meter passed after the initial application of the product.

The team returned on July 29th, 2020 to test both the hotel and the club. The most high-traffic areas including the revolving door, check-in reception and elevators all passed the ATP test 28 days later! This product is changing the way businesses clean, sanitize and disinfect surfaces to prevent the spread of the Coronavirus."

A handwritten signature in black ink that reads "Victor I. Rosenberg, M.D." with a stylized flourish at the end.

Victor I. Rosenberg, M.D
